

# MARKET LINKED DEBENTURES

Kindly note, this document is not an offer of debentures, it illustrates how market linked debentures work

## HOW DOES IT WORK?

Market Linked Debentures are aimed at providing targeted pay-off/ROI to investors

The issuer manages underlying risk by taking suitable positions in Futures and/or Options contract so that targeted returns can be generated.

Market Linked Debentures are issued under private placement guidelines. The investor receives debentures in Demat account.

Taxation – Gains/Returns at maturity are taxed as per investors tax slab

### OFFERING PRICE ON REISSUANCE

#### How much money to transfer per debenture?

The “offering price” (which is like NAV) of each working day is provided below. This Product Note is updated on <https://aim.abansone.com/>. The investor needs to transfer the exact value by 2 pm for investment to be considered for that particular day. Payment received post 2 pm will be considered for the next business day and the investor will have to transfer funds as per the offering price mentioned for the next business day which will be updated by 6:30 pm.

#### How the Offering Price is determined?

On the first date of new product launch, the investment happens at Rs. 1,00,000 per debenture which is the Face Value. After that, the debentures get offered on mark to market basis (at premium or discount) based on movement of Nifty Index/stock and also time left for maturity. The offering price reflects combined effect of both these parameters.
